<b>Wind Direction</b>	NE

circle one

**Mixed Fleet**

**Sunfish Class**

(note Handicap and Times not required for class race)

**M Scow**

Use appropriate column for elapsed time (either Mins:Secs or Mins to 1/100)

Calculate corrected times (CT) from elapsed times (ET) and handicaps (HC) using the formula:

$$CT = ( ET / ( HC \times MF1 \times MF2 ) ) \times 100$$

Where: CT = corrected time

ET = elapsed time

HC = D-PN handicap number

MF = modification factor (as needed)

Score race based on shortest corrected time = 1st, etc.
