

# **SYC 2010 - SUMMER SERIES**

<b>Date</b>	
<b>Course</b>	
<b>Start Time</b>	
<b>Wind Velocity (mph)</b>	
<b>Wind Direction</b>	

circle  
one

**Mixed Fleet**

**Sunfish Class**

(note Handicap and Times not required for class race)

**M Scow**

Use appropriate column for elapsed time  
(either Mins:Secs or Mins to 1/100)

Calculate corrected times (CT) from elapsed times (ET) and handicaps (HC) using the formula:

$$CT = ( ET / ( HC \times MF1 \times MF2 ) ) \times 100$$

Where: CT = corrected time

ET = elapsed time

HC = D-PN handicap number

MF = modification factor (as needed)

Score race based on shortest corrected time = 1st, etc.

	Skipper	Class	Sail Number	Handicap		Elapsed Time			Corrected Time	Place	Notes
				D-PN	Modification Factor	Minutes	Minutes 1/100	Seconds
